Skills: TypeScript | JavaScript | React | Node.js | Next.js | MongoDB | PostgreSQL | Python | Docker | Docker Compose | CI/CD | AWS S3 | RESTful APIs | Git

Languages: English | Russian | Portuguese

About Me

I'm a Frontend | Fullstack developer with 6+ years of experience building production web applications with TypeScript, React, Node.js, and Next.js. I work across the full stack, from building responsive UI and reusable frontend architecture to designing APIs, backend services, and database-driven features. I'm comfortable owning features end-to-end, including implementation, testing, CI/CD, Docker-based delivery and cloud integrations.

I focus on writing maintainable code, shipping reliable releases, and solving product problems with practical, scalable solutions.

Experience

Evolution - Frontend | Fullstack Developer

Jan 2020 - Jul 2026

- Built and maintained internal web tools with TypeScript, React, and Node.js, supporting multiple teams.
- Developed backend services and APIs in Node.js to power internal workflows and automation.
- Migrated CI/CD pipelines between Jenkins and GitLab CI, reducing infrastructure load and improving deployment reliability.
- Managed and extended Storybook with custom addons used by teams in day-to-day development.
- Improved compliance and game core components with a strong focus on reliability and code quality.
- Co-designed and launched an iOS bundle deployment and delivery system supporting faster and safer releases.
- Contributed to hiring and team growth through technical interviews and mentoring in the Evolution TypeScript Bootcamp.

Stack: TypeScript | React | Node.js | PostgreSQL | Python | Docker | GitLab CI | AWS S3 | Jenkins | Storybook

Movika - interactive video constructor in VK - Frontend Developer

Aug 2021 - Sep 2023

- Designed and implemented features for a custom interactive video constructor using TypeScript, React, and D3.js.
- Made architectural changes that helped the app scale and made it easier to maintain.
- Refactored the Redux store to improve state management and speed up adding new features.
- Set up TypeScript and linters to keep the codebase clean and reliable.
- Introduced Storybook to make component development and testing smoother for the team.
- Wrote and maintained unit tests with Jest to ensure code reliability.

Stack: TypeScript | React | Redux | D3.js | Jest | Architectural Design | Storybook

Freelance - Frontend | Fullstack Developer

May 2015 - Aug 2021

- Delivered web products end-to-end using Next.js and Node.js, from UI implementation to backend APIs.
- Built SaaS-style features with React/Next.js, including routing, server-side data handling, and admin functionality.
- Designed and integrated REST APIs, authentication flows, and database operations for fullstack applications.
- Developed and deployed cross-platform mobile apps with Cordova and Ionic, publishing to the App Store and Google Play.
- Built and shipped iOS prototypes in Swift to validate product ideas quickly.

Stack: TypeScript | JavaScript | React | Node.js | Next.js | Cordova | Ionic Framework | Angular | Swift

Serenity - Frontend Developer

May 2018 - Nov 2019

- Developed and optimized features for a real estate platform (properstar.com) using React and Redux.
- Analyzed and refactored the React application for performance improvements.
- Collaborated with the team to deliver new features and maintain high code quality.

Stack: JavaScript | React | Redux | Jest

MRSPPro.ru - Frontend Developer

May 2017 - May 2018

- Developed new features using JavaScript and React for a cross-platform application, "ConstructionControl" (StroyControl).
- Developed new user interfaces using HTML5, CSS3, Material-UI.
- Improved the in-app 2D engine based on the Canvas API.
- Organized frontend meet-ups to share best practices.

Stack: JavaScript | React | Canvas API | HTML5 | CSS3 | Material-UI

Elephant Games - Software | Game Developer

Nov 2015 - Mar 2017

- Developed and supported internal tools using C#/.NET, PHP, and JavaScript.
- Built admin panels for game event and player data management.
- Developed game features for "Midnight Castle" using Lua.

Stack: Lua | C#/.NET | PHP | JavaScript

Bencom LLC - Junior iOS Developer

Sep 2014 - May 2015

- Participated in iOS app development using Objective-C and Swift.
- Supported and improved the "Relax UP" mobile app.
- Prototyped a game with SpriteKit and Swift.
- Gained experience in mobile UI and app deployment.

Stack: Objective-C | Swift | iOS

Education

Mari State Technical University (MarSTU)

Specialist, Computer and Information Systems Security/Information Assurance

2012 - 2016

Studied cryptography and security, network security, information security management, risk analysis, and computer programming.

RUDN University: Peoples' Friendship University of Russia

Mathematics

2008 - 2012

Studied mathematical analysis, linear algebra, differential equations, probability theory, mathematical statistics, and numerical methods.
