Skills: TypeScript | JavaScript | React | Next.js | Node.js | Redux | Storybook | Jest | PostgreSQL | MongoDB | Python | Docker | CI/CD | GitLab CI | GitHub Actions | AWS S3 | REST APIs

Languages: English | Russian | Portuguese

About Me

Senior Frontend | Fullstack developer with 9+ years of experience shipping production web applications in TypeScript, React, Node.js, and Next.js. For the last several years I have owned frontend platform tooling for a large TypeScript monorepo shared by multiple product teams: linting and code-quality infrastructure, test and Storybook tooling, CI/CD pipelines, and internal documentation.

I work end-to-end across the stack, from responsive UI and reusable component architecture to REST APIs, database-backed features, Docker-based delivery, and cloud integrations, and I have shipped a solo-built SaaS product from first commit to production. I use AI-assisted development tooling daily and mentor other engineers through interviews and bootcamps. I focus on maintainable code, predictable releases, and practical solutions to real product problems.

Experience

Evolution

Jan 2020 - Present | Lisbon, Portugal | Riga, Latvia

Senior Frontend | Fullstack Developer (Jun 2023 - Present)

- Own frontend platform tooling for a large TypeScript monorepo used by multiple game and core teams: a shared ESLint config and custom ESLint plugin, Jest and Storybook upgrades, and an internal Docusaurus docs site.
- Migrated build, validation, and release pipelines from Jenkins to GitLab CI.
- Contributed to incremental CI validation tooling that checks only changed packages, adding governance rules and unit test coverage.
- Automated recurring team work with Node.js services and scripts: Jira issue sync from pipelines, Slack notifications, and scheduled maintenance pipelines.
- Ran technical interviews and mentored in the Evolution TypeScript Bootcamp, supporting hiring and team growth.

Frontend | Fullstack Developer (Jan 2020 - Jun 2023)

- Built and maintained the shared regulatory-compliance layer used across all games: reality checks, session limits and timers, regulator session handling, and responsible-gaming UI.
- Co-designed the build and delivery system for game clients embedded in native iOS and Android apps: automated builds, localization asset publishing, and image optimization.
- Built a Storybook-based platform for in-game documentation with custom addons.
- Extended the client integration API used by native and operator integrations, and hardened core game UI components.

Stack: TypeScript | React | Redux | Node.js | Webpack | Storybook | Jest | WebdriverIO | ESLint | GitLab CI | Jenkins | Docker | Docusaurus | PostgreSQL | Python | AWS S3

Movika (interactive video constructor for VK) - Frontend Developer (Part-time Contract)

Aug 2021 - Sep 2023 | Remote

- Designed and implemented features for a custom interactive video constructor using TypeScript, React, and D3.js.
- Made architectural changes that helped the app scale and made it easier to maintain.
- Refactored the Redux store to improve state management and speed up adding new features.

- Set up TypeScript, linting, and Jest unit tests to keep the codebase clean and reliable.
- Introduced Storybook to make component development and testing smoother for the team.

Stack: TypeScript | React | Redux | D3.js | Jest | Architectural Design | Storybook

Serenity - Frontend Developer

May 2018 - Nov 2019 | Yoshkar-Ola, Mari El, Russia

- Developed and optimized features for a real estate platform (properstar.com) using React and Redux.
- Analyzed and refactored the React application for performance improvements.
- Collaborated with the team to deliver new features and maintain high code quality.

Stack: JavaScript | React | Redux | Jest

MRSPro.ru - Frontend Developer

May 2017 - May 2018 | Yoshkar-Ola, Mari El, Russia

- Developed new features using JavaScript and React for a cross-platform application, "ConstructionControl" (StroyControl).
- Developed new user interfaces using HTML5, CSS3, Material-UI.
- Improved the in-app 2D engine based on the Canvas API.
- Organized frontend meet-ups to share best practices.

Stack: JavaScript | React | Canvas API | HTML5 | CSS3 | Material-UI

Elephant Games - Software | Game Developer

Nov 2015 - Mar 2017 | Yoshkar-Ola, Mari El, Russia

- Built internal tools and admin panels for game event and player data management using C#/.NET, PHP, and JavaScript.
- Developed game features for "Midnight Castle" using Lua.

Stack: Lua | C#/.NET | PHP | JavaScript

Bencom LLC - Junior iOS Developer

Sep 2014 - May 2015 | Yoshkar-Ola, Mari El, Russia

- Developed and maintained the "Relax UP" iOS app using Objective-C and Swift, including UI work and App Store deployment.
- Prototyped a game with SpriteKit and Swift.

Stack: Objective-C | Swift | iOS

Education

Mari State Technical University (MarSTU)

Specialist degree (5-year, MSc-equivalent), Computer and Information Systems Security

2012 - 2016

Cryptography, network security, information security management, and risk analysis.

RUDN University: Peoples' Friendship University of Russia

Mathematics

2008 - 2012

Mathematical analysis, linear algebra, probability theory, statistics, and numerical methods.
